FOUNDATIONS OF MECHANICS

SECOND EDITION

RALPH ABRAHAM JERROLD E. MARSDEN

AMS CHELSEA PUBLISHING

American Mathematical Society • Providence, Rhode Island

Contents

Preface to t	he AMS Chelsea Edition xiii
Preface to t	he Second Editionxv
Preface to t	he First Editionxvii
ntroduction	xix
Preview	xxiii
PART I PRE	LIMINARIES 1
Chapter 1.	Differential Theory
1.1	Topology
1.2	Finite-Dimensional Banach Spaces
1.3	Bound Britain Cultures
1.4	Exercises
1.5	Exercises .
1.6	Exercises

VIII CONTENTS

	Exercises	
1.7	Tensors	
	Exercises	59
Chapter 2.	Calculus on Manifolds	60
2.1	Vector Fields as Dynamical Systems	60
	Exercises	
2.2	Vector Fields as Differential Operators	
	Exercises	
2.3	Exterior Algebra	
	Exercises	
2.4	Cartan's Calculus of Differential Forms	
2.5	Exercises	
2.5	Orientable Manifolds	
2.6	Exercises	
2.0	Exercises	
2.7	Some Riemannian Geometry	
2.1	Exercises	156
PART II ANA	ALYTICAL DYNAMICS	159
Chapter 3.	Hamiltonian and Lagrangian Systems	161
3.1		
3.1	Symplectic Algebra	161
5.1	Exercises	174
3.2	Exercises	174 174
3.2	Exercises	174 174 185
	Exercises	174 174 185 187
3.2 3.3	Exercises	174 174 185 187 199
3.2	Exercises	174 174 185 187 199 201
3.2 3.3 3.4	Exercises	174 174 185 187 199 201 208
3.2 3.3	Exercises	174 174 185 187 199 . 201 208 208
3.2 3.3 3.4 3.5	Exercises	174 185 187 199 201 208 208
3.2 3.3 3.4	Exercises	174 174 185 187 199 201 208 217 218
3.2 3.3 3.4 3.5 3.6	Exercises	174 174 185 187 199 201 208 217 218 223
3.2 3.3 3.4 3.5	Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises Mechanics on Riemannian Manifolds	174 174 185 187 199 201 208 217 218 223
3.2 3.3 3.4 3.5 3.6	Exercises	174 174 185 187 199 201 208 217 218 223 224
3.2 3.3 3.4 3.5 3.6 3.7	Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises Mechanics on Riemannian Manifolds Exercises	174 174 185 187 199 201 208 217 218 223 224 244
3.2 3.3 3.4 3.5 3.6 3.7	Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises Mechanics on Riemannian Manifolds Exercises Variational Principles in Mechanics	174 174 185 187 199 201 208 217 218 223 224 244 252
3.2 3.3 3.4 3.5 3.6 3.7 3.8	Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises Mechanics on Riemannian Manifolds Exercises Variational Principles in Mechanics Exercises	. 174 . 174 . 185 . 187 . 199 . 201 . 208 . 217 . 218 . 223 . 224 . 244 . 252

4.2	The Momentum Mapping	
4.2	Exercises	
4.3	Reduction of Phase Spaces with Symmetry	
4.4	Hamiltonian Systems on Lie Groups and the Rigid Body.	
7.7	Exercises	
4.5	The Topology of Simple Mechanical Systems	
	Exercises	. 359
4.6	The Topology of the Rigid Body	
	Exercises	. 368
Chapter 5.	Hamilton-Jacobi Theory and Mathematical Physics	. 370
5.1	Time-Dependent Systems	.370
	Exercises	. 378
5.2	Canonical Transformations and Hamilton-Jacobi Theory .	
	Exercises	
5.3	Lagrangian Submanifolds	
5.4	Exercises	
5.4 5.5	Quantization	
ر.ر		
	Exercises	. 4X6
5.6	Exercises	
PART III AN	Introduction to Nonlinear Oscillations	489 507
	Introduction to Nonlinear Oscillations	489 507
PART III AN	Introduction to Nonlinear Oscillations	507 . 509
PART III AN Chapter 6.	Introduction to Nonlinear Oscillations	507 . 509 . 509
PART III AN	Introduction to Nonlinear Oscillations	507 . 509 . 513 . 513
Chapter 6. 6.1 6.2	Introduction to Nonlinear Oscillations	507 . 509 . 509 . 513 . 513
PART III AN Chapter 6.	Introduction to Nonlinear Oscillations	507 . 509 . 509 . 513 . 513 . 515 515
Chapter 6. 6.1 6.2	Introduction to Nonlinear Oscillations	507 . 509 . 509 . 513 . 513 . 515 515
Chapter 6. 6.1 6.2	Introduction to Nonlinear Oscillations	507 . 509 . 509 . 513 . 513 . 515 . 515
Chapter 6. 6.1 6.2 6.3	Introduction to Nonlinear Oscillations I OUTLINE OF QUALITATIVE DYNAMICS Topological Dynamics Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Differentiable Dynamics	507 . 509 . 509 . 513 . 515 . 515 . 519
Chapter 6. 6.1 6.2 6.3 Chapter 7.	Introduction to Nonlinear Oscillations I OUTLINE OF QUALITATIVE DYNAMICS Topological Dynamics Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises	507 . 509 . 509 . 513 . 515 . 515 . 519
Chapter 6. 6.1 6.2 6.3 Chapter 7.	Introduction to Nonlinear Oscillations I OUTLINE OF QUALITATIVE DYNAMICS Topological Dynamics Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Critical Elements Exercises Stable Manifolds	507 . 509 . 509 . 513 . 513 . 515 . 519 . 520 . 525 . 525
Chapter 6. 6.1 6.2 6.3 Chapter 7. 7.1	Introduction to Nonlinear Oscillations I OUTLINE OF QUALITATIVE DYNAMICS Topological Dynamics Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Critical Elements Exercises Stable Manifolds Exercises	507 . 509 . 513 . 513 . 515 . 519 . 520 . 525 . 525 . 531
Chapter 6. 6.1 6.2 6.3 Chapter 7.	Introduction to Nonlinear Oscillations I OUTLINE OF QUALITATIVE DYNAMICS Topological Dynamics Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Olifferentiable Dynamics Critical Elements Exercises Stable Manifolds Exercises Generic Properties	507 .509 .509 .513 .515 .515 .519 .520 .525 .525 .531
Chapter 6. 6.1 6.2 6.3 Chapter 7. 7.1 7.2 7.3	Introduction to Nonlinear Oscillations I OUTLINE OF QUALITATIVE DYNAMICS Topological Dynamics Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Olifferentiable Dynamics Critical Elements Exercises Stable Manifolds Exercises Generic Properties Exercises Exercises	. 509 . 509 . 513 . 513 . 515 . 519 . 520 . 525 . 525 . 531 . 534
Chapter 6. 6.1 6.2 6.3 Chapter 7. 7.1	Introduction to Nonlinear Oscillations I OUTLINE OF QUALITATIVE DYNAMICS Topological Dynamics Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Olifferentiable Dynamics Critical Elements Exercises Stable Manifolds Exercises Generic Properties	507 . 509 . 509 . 513 . 513 . 515 . 519 . 520 . 525 . 525 . 531 . 534 . 534

x CONTENTS

7.5	Absolute Stability and Axiom A	
7.6	Exercises	
7.0	Exercises	
7.7	A Zoo of Stable Bifurcations	
7.8	Experimental Dynamics	
Observation 6		
Chapter 8.	Hamiltonian Dynamics	
8.1	Critical Elements	
8.2	Orbit Cylinders	
8.3	Exercises	
0.5	Exercises	
8.4	Generic Properties	
8.5	Structural Stability	
8.6	A Zoo of Stable Bifurcations	
8.7	The General Pathology	
8.8	Experimental Mechanics	. 610
PART IV CE	LESTIAL MECHANICS	617
Chapter 9.	The Two-Body Problem	. 619
Chapter 9. 9.1	Models for Two Bodies	. 619
9.1	Models for Two Bodies	. 619 . 624
9.1 9.2	Models for Two Bodies	. 619 . 624 .624
9.1 9.2 9.3	Models for Two Bodies	. 619 . 624 .624 . 631
9.1 9.2 9.3 9.4	Models for Two Bodies	.619 .624 .624 .631
9.1 9.2 9.3 9.4 9.5	Models for Two Bodies	.619 .624 .624 .631 .635
9.1 9.2 9.3 9.4	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables	.619 .624 .624 .631 .635 .638
9.1 9.2 9.3 9.4 9.5 9.6	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises	.619 .624 .624 .631 .635 .638 .647
9.1 9.2 9.3 9.4 9.5	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises Summary of Models	. 619 . 624 . 624 . 631 . 635 . 638 . 647 . 652
9.1 9.2 9.3 9.4 9.5 9.6	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises	. 619 . 624 . 624 . 631 . 635 . 638 . 647 . 652 652
9.1 9.2 9.3 9.4 9.5 9.6	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises Summary of Models Exercise	. 619 . 624 . 624 . 631 . 635 . 638 . 647 . 652 . 656 . 656
9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 Chapter 10.	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises Summary of Models Exercise Topology of the Two-Body Problem The Three-Body Problem	.619 .624 .624 .631 .635 .638 .647 .652 .652 .656
9.1 9.2 9.3 9.4 9.5 9.6 9.7	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises Summary of Models Exercise Topology of the Two-Body Problem The Three-Body Problem Models for Three Bodies	. 619 . 624 . 624 . 631 . 635 . 638 . 647 . 652 . 656 . 656
9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 Chapter 10.	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises Summary of Models Exercise Topology of the Two-Body Problem Models for Three Bodies Exercises	. 619 . 624 . 624 . 631 . 635 . 638 . 647 . 652 . 656 . 656 . 663 . 673
9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 Chapter 10.	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises Summary of Models Exercise Topology of the Two-Body Problem The Three-Body Problem Models for Three Bodies	. 619 . 624 . 624 . 631 . 635 . 638 . 647 . 652 . 656 . 663 . 663 . 673 . 675
9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 Chapter 10.	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises Summary of Models Exercise Topology of the Two-Body Problem The Three-Body Problem Models for Three Bodies Exercises Critical Points in the Restricted Three-Body Problem	.619 .624 .624 .631 .635 .638 .652 .652 .656 .656
9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 Chapter 10. 10.1	Models for Two Bodies Exercises Elliptic Orbits and Kepler Elements The Delaunay Variables Lagrange Brackets of Kepler Elements Whittaker's Method Poincaré Variables Exercises Summary of Models Exercise Topology of the Two-Body Problem The Three-Body Problem Models for Three Bodies Exercises Critical Points in the Restricted Three-Body Problem Exercises	.619 .624 .624 .631 .635 .638 .647 .652 .656 .656 .663 .673 .675 .687 .688
